

Bleumi Pay Hosted Checkout for Magento Commerce

Accept ERC-20, xDai, Algorand Standard Asset (ASA) Payments on your Magento Commerce Store with Bleumi Pay.

Integration Overview

Step 1: Configure your Bleumi Pay Account:

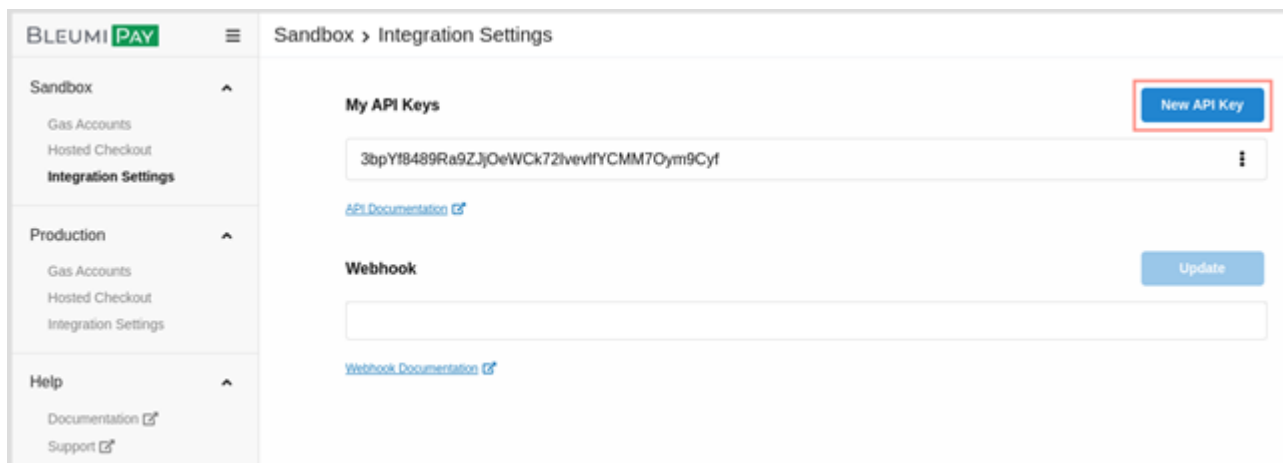

- Create API Key
- Setup Gas Accounts
- Setup Hosted Checkout

Step 2: Install & Configure Bleumi Pay Magento Module for Magento Commerce.

Step 1: Configure your Bleumi Pay Account

Log in to [Bleumi Pay Dashboard](#) and navigate to **Sandbox (or) Production > Integration Settings** and click **New API Key** to create an API Key.

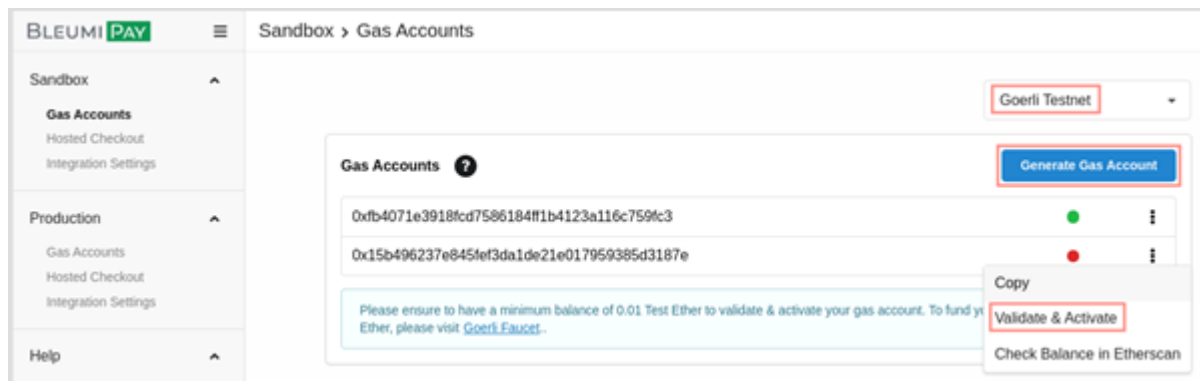

Note: Production network access requires a verified account. To enable production access, contact support@bleumi.com.

Setup Gas Accounts

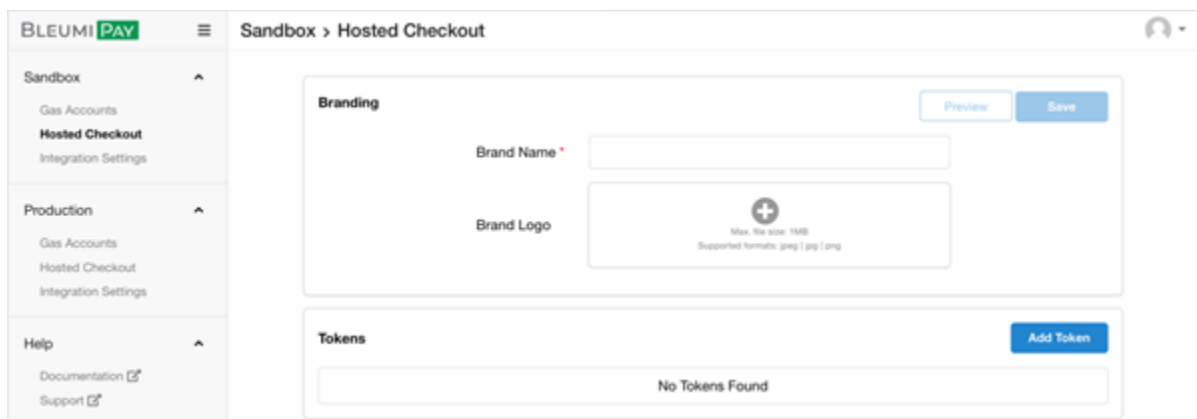

Setup & Authorize Ethereum Gas Account(s) to (fund &) execute all your Payment Operations on Ethereum Network. A single Ethereum Gas Account can process on an average 4 transactions per minute (based on the Ethereum Network's usage).

- 1) Log in to [Bleumi Pay Dashboard](#) and navigate to **Sandbox (or) Production > Gas Accounts**.
- 2) **Select the Network** for which the Gas Account needs to be setup.
- 3) Click **Generate Gas Account**.
- 4) **Fund Gas** to the Gas Account and click on **Validate & Activate** to activate the Gas Account.

Setup Hosted Checkout

- 1) Log in to [Bleumi Pay Dashboard](#) and navigate to **Sandbox (or) Production > Hosted Checkout**.
- 2) Under **Branding**, customize the Brand Name and Brand Logo to be displayed in the Bleumi Pay Hosted Checkout of your Magento Commerce Store.

- 3) Under **Tokens**, click **Add Token** to configure the tokens that you wish to receive as payments from your Magento Commerce Store users. You can either:
 - a. **Select a predefined token** and provide a Token Settlement Address (Your Wallet Address to receive payments).
 - b. **Add a custom token**

Step 2: Install & Configure Bleumi Pay Magento Commerce Module

Bleumi Pay Module Installation

Run the following commands in the root folder of your Magento 2 installation.

```
$ composer require bleumi/bleumi-pay-magento2
$ bin/magento setup:db-declaration:generate-whitelist (>= 2.3.3)
$ bin/magento setup:db-schema:upgrade (<= 2.3.2)
$ bin/magento setup:upgrade
$ bin/magento cache:clean
$ bin/magento cache:flush
$ bin/magento setup:di:compile
$ bin/magento setup:static-content:deploy -f
```

Bleumi Pay Module Configuration

- 1) Log in to your Magento 2 Admin Panel.
- 2) Navigate to **Select Stores > Configuration > Sales > Payment Methods** and click on **“Configure”** button next to the Bleumi Pay payment method.
- 3) Open Payment settings select **Yes** in the **“Enable Bleumi Pay”** dropdown to enable Bleumi Pay Module.
- 4) Copy and paste your Bleumi Pay API Key from Bleumi Pay Dashboard > Sandbox (or) Production > Integration Settings.
- 5) Click **“Save Config”** button at the top of the page.
